

Rafael Blanco

**Anaesthetic Department, Corniche Hospital, Abu Dhabi, UAE
United Arab Emirates**

Dr. Rafa Blanco is a Consultant Anaesthetist currently based at Corniche Hospital in Abu Dhabi, UAE. He is the Founder and Honorary President of the London Society of Regional Anaesthesia. Co-Author of National Institute for Health and Clinical Excellence IP661: Ultrasound-guided regional nerve block guidelines. His main interest is ultrasound-guided regional anaesthesia, a field where he has contributed with the following: description of the Blanco block (quadratus lumborum block), Thoracic wall blocks (Pecs I and II and serratus plane block), an echogenic epidural needle (Rafa Tuohy, Vygon) and advisor in the design of multiple ultrasound machines. Other areas of development are an anaesthetic online logbook, a website (www.lsora.com) and learning curves (CUSUM) applied to anaesthesia. Rafa Blanco has written two books and contributed to ten more in ultrasound regional anaesthesia. He has written several papers for international magazines. Course director for countless local and international workshops, congresses and meetings. Lectured in multiple congresses worldwide. His researching actively at the moment is 3D reconstructions fascial blocks and thoracic blocks as an alternative to paravertebrals or thoracic epidural. Currently, he also assumes the guest editor of SCI journal (<https://www.hindawi.com/journals/bmri/si/539081/cfp/>).
