

Adrian Goudie

**Fiona Stanley Hospital & King Edward Hospital for Women
Australia**

Dr Adrian Goudie is an Emergency Physician at Fiona Stanley Hospital and King Edward Hospital for Women, in Western Australia. He completed his undergraduate degree and emergency training in Perth before working in Australia, South Africa and England, where he began training in ultrasound and echocardiography. His research interests include the use of ultrasound in critical illness and focused ultrasound in emergency management. He is regularly involved in ultrasound training and education for critical care doctors. He is Vice President 2 of the World Federation for Ultrasound in Medicine and Biology, a past president of the Australasian Society for Ultrasound in Medicine and member of the Ultrasound Subcommittee of the Australasian College for Emergency Medicine.
