## **Chiun-Sheng Huang** MD, PhD, MPH

**National Taiwan University Hospital and National Taiwan University College of Medicine  
Taiwan**

---

Chiun-Sheng Huang is the professor and chairman of Department of Surgery at the National Taiwan University Hospital and National Taiwan University College of Medicine. He is also the director of Breast Care Center at the National Taiwan University Hospital, Taipei, Taiwan. He had been the president of the Breast Cancer Society of Taiwan and is currently the chairman of Taiwan Breast Cancer Consortium, an academic research organization focusing on multi-center clinical trials.

Dr Huang has dedicated his career to the prevention and treatment of breast cancer. His areas of research include: ultrasound in breast cancer screening and axillary staging; computer-aided diagnosis and detection of breast ultrasound; single nucleotide polymorphism and circulating tumor DNA as susceptibility and prognostic factor for breast cancer; and development of new regimens and biomarkers using neoadjuvant therapy. He has been the study chair of a nationwide randomized trial of breast cancer screening using ultrasound and mammography for women aged 40–49, and a multi-national randomized trial of active immunotherapy in metastatic breast cancer. He has also been a Steering Committee member in several global trials investigating anti-Her-2 target therapies, anti-PDL1 antibody and CDK4/6 inhibitor for breast cancer in adjuvant and neoadjuvant setting. Dr. Huang has published 150 papers in related fields.
